A Message From The President

Dear colleagues and friends

In spite of the devastating war that has rampaged our beloved Lebanon, the Lebanese Pediatric Society has decided to go on with our annual congress as a statement of confidence in our ability to carry on our mission in supporting continuous medical education through the darkest of times. The only change we did was to shift to a hybrid format to allow the maximum number of our colleagues to attend.

When we first talked about topics for the congress we decided to stress on the new guidelines in common pediatric conditions that we see regularly in an effort to try to unify the current practices in different hospitals and areas across Lebanon .

I would like to dearly express my gratitude to the members of the organizing committee and the scientific committee for their dedication and to our sponsors for their great support that helped bring this conference to life.

Finally, once again I would like to welcome you all and hope this congress will have an impact on the way we practice pediatrics.

Best regards to all

Mona Alameh, MD
